---

Diligent front-end web developer with a firm foundation in HTML, CSS and JavaScript and eager to expand their knowledge. Interested in how responsive design and web accessibility can be used to distribute content to the widest possible audience. Pays thoughtful and meticulous attention to detail.

## Skills/Tools

---

HTML5

CSS3

Bootstrap

Responsive Design

JavaScript

jQuery

React

Jasmine

Gulp

Git/Github

Remote work experience

Web Accessibility

## Projects

---

### Morganton Meal Map [link](#)

The aim was to learn a new framework and build a favorite places app from the ground up in a limited amount of time. Coded in React JS using the Google Maps/Street View and Foursquare APIs.

### Restaurant Map [link](#)

Converted a static website to a responsive layout with offline capability by means of a service worker.

### Concentration Game [link](#)

Web version of the card game Concentration. Mobile-first design.

### Frogger Game Clone [link](#)

A web-based cross the road game based on Frogger using object-oriented JavaScript and keyboard accessible.

## Education

---

**Udacity**, Front end web developer nanodegree

**Ohio State University**, B.A. History
